

# Vocabulary Graphic Organizer

**You will make your own for each new vocab word.**

**Only one word on a page.**

**All vocab for the whole year must stay together (Do not mix and match notes+vocab+random things.)**

- Place the correctly spelled word in the center of the page in big letters
- Write down the type of speech it is (noun, verb, adjective) and box it
- Write the definition (from dictionary or teacher) underneath the word
- Rewrite the definition into words that make sense to you (kid friendly) and place in parentheses
- Draw a picture of the word or create a symbol and box it in the upper right
- List examples or connections if you can in the upper left
- Write a sentence with the word in it at the bottom and underline it
- Return to the word to add to it as time goes by!

See example on the back
